## OUR VISION

***"To deliver solutions that meet TRUE business needs. We focus on what is important to our customers, without losing sight of our business ideals. We form partnerships to establish a shared vision, passion, and accountability for success."***

## OUR BACKGROUND

ERP Software Management was founded in 2014 by a vibrant SAP consultant with a strong financial background. ERP Software Management has become a leading provider for technology and business management software solutions in South Africa and throughout West Africa. We offer a solid foundation built by our management team with the skills and considerable experience they have accumulated over many years.

ERP Software Management provide fully customized, tailor-made and innovative

solutions to create a competitive advantage for businesses in South Africa and Africa at large. Our services include ERP customized solutions, software development, application modifications of ERP software systems, SAP implementation, outsourcing and placement.

ERP Software Management is a mission-oriented Information Technology hub, enabling customers from small and medium to large enterprise market spaces to obtain technological solutions designed to ensure the highest standards of business productivity and intelligence. ERP Software Management is a SAP Ecosystem Partner with SAP SE.

Our innovative portfolio of solutions presents limitless opportunities for customers to engage in strategic business planning, increase efficiencies and enhance business operations and processes. Additionally, ERP Software Management offers customers the advantage of carefully designed business applications and services delivered in accordance with their exact business model requirements by using the applicable IT industry standards. It is our highest priority to ensure that our comprehensive services meet the needs of the entire business's value chain. Our highly customizable, state-of-the-art business solutions will create distinctive competency to add significant value for business customers in the new economy.

What sets ERP Software Management apart from other technology services providers? Unsurpassed technological and business expertise, a rapid deployment capability, and unparalleled success in helping organizations move through the barriers of technology transition. ERP Software Management provides comprehensive solutions that will meet, and exceed, your expectations.

---

## OUR MANAGING DIRECTOR

### Abiola Oliyide

Co-founder of ERP Software Management, Abiola has more than 10 years in business process management and finance. Since 2006, Abiola has honed his craft in Business Management and Finance. He comes with extensive leadership experience from a variety of organizations, in addition to ten years' hands-on experience as a Functional SAP Consultant.

Abiola achieved a National Diploma in Accountancy at the Yaba College of Technology, Lagos, Nigeria. He also studied SAP Finance at the SAP Academy in Woodmead, South Africa. Forever pursuing ways to further his education, skills and experience, Abiola is currently pursuing his Bachelor of Commerce with Honours in Accounting Science at the University of South Africa in order to become a Chartered Accountant (CA) SA.

## SAP CONSULTING

SAP is at the centre of today's technology revolution. The market leader in enterprise application software, SAP helps organisations fight the damaging effects of complexity; generate new opportunities for innovation and growth; and, stay ahead of the competition.

For over 40 years SAP has delivered enterprise solutions, such as SAP Business One and SAP Business All in One, to companies and organizations around the globe. More than 200,000 of the world's best-run businesses are SAP customers.

We have helped businesses run more efficiently through the use of world-class business software applications that help invent, commercialize and mainstream the products and services of the global economy. ERP Software Management can help streamline your business to accelerate your profit growth, by Sourcing Certified SAP Consultant, SAP Implementation, SAP Training and Support.

By listening closely in the consulting period, ERP Software Management is able to include your requests and specifications to ensure a smooth implementation process. As a SAP Partner, ERP Software Management possesses the skills and expertise you need to achieve a successful SAP Implementation.

---

## SAP RESOURCING

ERP Software Management's core business is SAP resourcing either on an individual resource basis or as a SAP project team. We have certified, skilled and experienced consultants on our database that can take any project assignment in South Africa and, indeed, any part of Africa as a whole. Our SAP Consultants are all Certified with implementation and Training experience.

ERP Software Management supplies consultants on a time and materials basis, as well as on a fixed-term contract basis. The contract lengths available range from short term to yearly contracts. Our consultants are both functional and technical SAP resources, who also specialize in SAP Basis support and upgrades.

We supply functional and technical resources to our clients in a variety of sectors including manufacturing, retail, banking, automobile, oil, gas and mining. As a SAP Service partner, ERP Software Management are capable of delivering comprehensive SAP services to our client to make digital transformation possible.

---

# SOFTWARE APP DEVELOPMENT

ERP Software Management delivers high-quality enterprise software and mobile apps to clients in South Africa and West Africa. Our professional team's divergent thinking and natural curiosity to discover new mobile development techniques motivates ERP Software Management to build apps that can be a profitable asset and revenue raiser for our clients.

ERP Software Management is the company you can trust with your software development. Our developers take their time on each and every project to ensure a smooth process for business and organizations, from

design, wireframe, development and testing through to deployment. We make use of programming languages including, but not limited to, JAVA, C++,HTML5,CSS and JQUERY

---

# MOBILE APP DEVELOPMENT

ERP Software Management specializes in custom Mobile App Development. Every project we undertake is fully customized to suit your business or organization. We implement a specific App Development approach in order to tailor our service to your exact needs.

## Our approach to App Development:

- **APP STRATEGY & CONCEPT:** Get your idea out on paper.
- **WIREFRAME DESIGN:** See the flow of your app before we start with coding.
- **GRAPHIC DESIGN:** Develop a stunning design for your app.
- **DEVELOPMENT:** Have an experienced App Developer create the best app to achieve the results you need.
- **TESTING:** Extensive testing to ensure your app works the way you want it to, no matter the device you use.
- **PUBLISH IN APP STORE & LAUNCH:** Once you are happy with the app, it's time for us to launch it on the App Store.

---

## OUTSOURCING

ERP Software Management can quickly find businesses both contract and permanent employees to meet their specific requirements. We can ensure you do not need to worry about getting projects completed in time by delivering qualified and skilled professionals for any position.

Our staffing department can provide Information Technology and SAP professionals as well as finance and management staff for any position from junior to executive., ERP Software Management can help cultivate SAP/IT resources rapidly and ensure the correct fit for each client's specific needs and objectives

### Contract

We provide candidates for all kinds of assignments and projects. This includes long and short term contracts in varied fields such as SAP consultancy, finance, information technology and management. Positions range from entry to senior executive level.

### Permanent

Permanent candidates are supplied according to customer specification for all levels and most divisions and disciplines in a business environment. Positions and packages range from junior entry level to senior project managers and product specialists.

ERP Software Management's extensive networks gives customers access to a large number of highly experienced and skilled professionals who have all been carefully screened. We always assess applicants thoroughly before suggesting a shortlist the top candidates to our clients.

---

## CORPORATE BRANDING

At ERP Software Management, we understand the impact of branding on a business like yours. ERP Software Management provides corporate branding to any sized business to help revitalise your company's image and make it stand out from your competitors. We value our clients and treat them with the utmost respect, delivering above our clients' expectation. With each and every project, ERP Software Management's team of experienced developers and designers will only finalize the work once our client is 100% satisfied with our team's work.

## CYBER SECURITY

At ERP Software Management system security is very vital to us, we don't just develop and implement software we also make sure they are protected from hackers, Fraud, System Manipulation and more.

SAP systems and business-critical applications store the most critical corporate data that can at some point be used for espionage, sabotage or fraud purposes.

Unfortunately, because of extreme complexity and the high level of customization these applications are vulnerable to many attacks. Manual in-depth assessment of an SAP landscape is a very time-consuming process as, for example, there may be more than 400 user access control vulnerabilities and configuration issues just in one system.

Numerous general security solutions, from security scanners to Security Information and Event Management (SIEM), scarcely protect ERP System.

SAP security is a combination of 3 different areas: Vulnerability Management, Source Code Security and Segregation of Duties. Unique expertise is required to manage all of these areas together. Most solutions focused on SAP cover only a narrow set of issues.

---
